

is proud to present

# *On-site Exploration Drill Site* **Safety for Drillers**

This course has been designed to equip operational drill site staff (drillers and drill rig assistants) with the knowledge and skills essential to manage day-to-day drill site hazards.

This course is presented in English, thus, it is essential that delegates have at least a basic level of spoken and written English to fully benefit from the course.

This is a practical course and is designed to be run on site.

**This course requires a minimum of 5 participants with a maximum of 15.**

## **WHO SHOULD ATTEND?**

Aimed specifically at Drillers, Drill Rig Assistants and Foremen

## **ABOUT THE COURSE**

This is a full one day course and it is essential that delegates attend for the full duration of the day to gain full benefit from the training.

## **COURSE OUTLINE**

- The essential role of the driller in a drilling operation
- The Drillers' and Drill rig assistant's duties in terms of The Mine Health and Safety Act
- Principles of risk assessment
- Drill site hazard identification

## **REGISTRATION PROCESS**

As the logistics of this course are customised according to the company we are dealing with, registration requirements will be dealt with individually.

Should you be interested in running this course for your company, please fill in the 'request for quotation' form and we will furnish you with a quotation based on your requirements.

The cost of the training includes training aids, an assessment and certificate of attendance. Other variables will dictate the overall cost of the training course.
